

Question ID	Section	Question
203471	LOGICAL REASONING	<p>Find the missing number in the series :</p> <p>353, 354, 351, 356, 349, ?</p> <p>314991</p> <p>314992</p> <p>314993</p> <p>314994</p> <p>314995</p> <p>Correct Option: 314995</p> <p>Candidate Response: 314995</p>
203472	LOGICAL REASONING	<p>What will come in place of the "?" in the following numerical series :</p> <p>6, 9, 14, 21, 30, ?</p> <p>314996</p>

		<div>314997</div> <div>314998</div> <div>314999</div> <div>315000</div> <div><div>Correct Option: 315000</div><div>Candidate Response: 315000</div></div>
203473	LOGICAL REASONING	<div>Identify the wrong digit in the given number series :</div> <div>4, 2, 3.5, 7.5, 26.25, 118.125</div> <div>315001</div> <div>315002</div> <div>315003</div> <div>315004</div> <div>315005</div> <div><div>Correct Option: 315002</div><div>Candidate Response: 315005</div></div>
203474	LOGICAL REASONING	<div>Find the next number of the given series :</div> <div>1, 1, 2, 3, 5, 8, 13, ?</div> <div>315006</div> <div>315007</div> <div>315008</div> <div>315009</div> <div>315010</div> <div><div>Correct Option: 315006</div><div>Candidate Response: 315009</div></div>
203475	LOGICAL REASONING	<div>What shall be the sum of the first 2007 terms of the series given below :</div> <div>1, 2, 3, 4, 1, 2, 3, 4, 1, 2, 3, 4,</div> <div>315011</div> <div>315012</div>

		<div>315013</div> <div>315014</div> <div>315015</div> <div><div>Correct Option: 315011</div><div>Candidate Response: 315011</div></div>
203476	LOGICAL REASONING	<div>Find the digit that shall come in place of "?" in the given series :</div> <div>5, 10, 17, 26, ?, 50</div> <div>315016</div> <div>315017</div> <div>315018</div> <div>315019</div> <div>315020</div> <div><div>Correct Option: 315017</div><div>Candidate Response: 315017</div></div>
203477	LOGICAL REASONING	<div><div><div><div></div><div></div></div><div>If :</div><div>432 : 24, then 735 : ?</div></div><div>TheTopPercentile</div></div> <div>315021</div> <div>315022</div> <div>315023</div> <div>315024</div> <div>315025</div> <div><div>Correct Option: 315021</div><div>Candidate Response: 315021</div></div>
203478	LOGICAL REASONING	<div><div>If :</div><div>520 : 738</div><div>Then :</div><div>? : 350</div></div> <div>315026</div> <div>315027</div> <div>315028</div>

		<div>315029</div> <div>315030</div> <div><div>Correct Option: 315026</div><div>Candidate Response: 315029</div></div>
203479	LOGICAL REASONING	<div>If :</div> <div>6524 : 6465</div> <div>Then;</div> <div>9638 : ?</div> <div>315031</div> <div>315032</div> <div>315033</div> <div>315034</div> <div>315035</div> <div><div>Correct Option: 315034</div><div>Candidate Response: 315032</div></div>
203480	LOGICAL REASONING	<div>Identify the set of option that satisfies the condition given in the set provided :</div> <div>[2846, 8462, 2864]</div> <div>315036</div> <div>315037</div> <div>315038</div> <div>315039</div> <div>315040</div> <div><div>Correct Option: 315040</div><div>Candidate Response: 315037</div></div>

203481

LOGICAL
REASONING

Study the information given in the given chart carefully and answer the question that follows :

Given below are the Sales figures of four products produced by THE Company for five years in ₹ Lakhs :

Year	Product A	Product B	Product C	Product D
2021	180	230	200	190
2022	180	150	100	130
2023	200	160	120	140
2024	220	190	150	160
2025	250	210	180	170

Which product(s) showed the highest percentage growth from the period 2021 to 2025 ?

315041

315042

315043

315044

315045

Correct Option: 315041**Candidate Response:** 315041

203482

LOGICAL
REASONING

Study the information given in the given chart carefully and answer the question that follows :

Given below are the Sales figures of four products produced by THE Company for five years in ₹ Lakhs :

Year	Product A	Product B	Product C	Product D
2021	180	230	200	190
2022	180	150	100	130
2023	200	160	120	140
2024	220	190	150	160
2025	250	210	180	170

In which year was the combined sales of all products maximum ?

315046

315047

315048

315049

315050

Correct Option: 315050**Candidate Response:** 315050

203483

LOGICAL
REASONING

Study the information given in the given chart carefully and answer the question that follows :

Given below are the Sales figures of four products produced by THE Company for five years in ₹ Lakhs :

Year	Product A	Product B	Product C	Product D
2021	180	230	200	190
2022	180	150	100	130
2023	200	160	120	140
2024	220	190	150	160
2025	250	210	180	170

Determine the average annual sales of Product B over the five years ?

315051

315052

315053

315054

315055

Correct Option: 315052**Candidate Response:** 315052

203484

LOGICAL
REASONING

Study the information given in the given chart carefully and answer the question that follows :

Given below are the Sales figures of four products produced by THE Company for five years in ₹ Lakhs :

Year	Product A	Product B	Product C	Product D
2021	180	230	200	190
2022	180	150	100	130
2023	200	160	120	140
2024	220	190	150	160
2025	250	210	180	170

In which year did Product D contribute the least percentage to total sales ?

315056

315057

315058

315059

315060

Correct Option: 315059**Candidate Response:** 315057

203485

LOGICAL
REASONING

Study the information given in the given chart carefully and answer the question that follows :

Given below are the Sales figures of four products produced by THE Company for five years in ₹ Lakhs :

Year	Product A	Product B	Product C	Product D
2021	180	230	200	190
2022	180	150	100	130
2023	200	160	120	140
2024	220	190	150	160
2025	250	210	180	170

What is the approximate ratio of total sales of Product A to Product C over the 5 years ?

315061

315062

315063

315064

315065

Correct Option: 315064**Candidate Response:** 315062

203486

LOGICAL
REASONING

Identify the Odd One Out :

3808, 2321, 8261, 8261, 825

315066

315067

315068

315069

315070

Correct Option: 315066**Candidate Response:** 315068

203487	LOGICAL REASONING	<p>Identify the Odd One Out :</p> <p>315071</p> <p>315072</p> <p>315073</p> <p>315074</p> <p>315075</p>	<table><tr><td>Correct Option: 315074</td><td>Candidate Response: 315072</td></tr></table>	Correct Option: 315074	Candidate Response: 315072
Correct Option: 315074	Candidate Response: 315072				
203488	LOGICAL REASONING	<p>Read the Information given below carefully and answer the Question that follows :</p> <p>Masoomah Restaurant, stays open every Monday to Saturday but is closed on all Sundays. On Mondays, Tuesdays and Thursdays, only Lunch is served. On Wednesdays, Fridays, and Saturdays, just dinner is served.</p> <p>The Restaurant's floors are polished and plants are watered only on days that the Restaurant is open for business, according to the following schedule :</p> <p>✓Plants are watered two days each week, but never on consecutive days and never on the same day that floors are polished ;</p> <p>✓Floors are polished on Monday and two other days each week, but never on consecutive days and never on the same day that plants are watered.</p> <p>According to the given schedule, the Restaurant's floors are polished on :</p> <p>315076</p> <p>315077</p> <p>315078</p> <p>315079</p> <p>315080</p>	<table><tr><td>Correct Option: 315077</td><td>Candidate Response: 315078</td></tr></table>	Correct Option: 315077	Candidate Response: 315078
Correct Option: 315077	Candidate Response: 315078				

203489

LOGICAL
REASONING

Count the number of Cubes in the figure given below :

315081

315082

315083

315084

315085

Correct Option: 315085**Candidate Response:** 315085

203490

LOGICAL
REASONING

Find the number that shall come in place of "?" in the given table :

7	3	6	2
2	8	5	4
1	1	2	4
4	2	1	?

315086

315087

315088

315089

315090

Correct Option: 315089**Candidate Response:** 315088

203491	LOGICAL REASONING	<p>In a word arrangement machine, when an input line of words is given, the machine rearranges it in every step following a certain rule.</p> <p>Following is an illustration of an input line of words and various steps of rearrangement.</p> <p>Input: gone are take enough brought station Step 1: take gone are enough brought station Step 2: take are gone enough brought station Step 3: take are station gone enough brought Step 4: take are station brought gone enough</p> <p>Step 4 is the last step for this input.</p> <p>Now, find out an appropriate step in the following question following the above rule.</p> <p>Input: car on star quick demand fat</p> <p>What will be the third step for this input ?</p> <p>315091</p> <p>315092</p> <p>315093</p> <p>315094</p> <p>315095</p> <div> <div>Correct Option: 315094</div> <div>Candidate Response: 315093</div> </div>
203492	LOGICAL REASONING	<p>An electronic device when fed with the numbers, rearranges them in a particular order following certain rules.</p> <p>The following is a step-by-step process of rearrangement for the given input of numbers.</p> <p>Input - 85 16 36 04 19 97 63 09</p> <p>Step I - 97 85 16 36 04 19 63 09</p> <p>Step II - 97 85 63 16 36 04 19 09</p> <p>Step III - 97 85 63 36 16 04 19 09</p> <p>Step IV - 97 85 63 36 19 16 04 09</p> <p>Step V - 97 85 63 36 19 16 09 04</p> <p>Step V is the last step.</p> <p>Which of the following will be the last step for the input given below :</p> <p>Input : 03 31 43 22 11 09</p> <p>315096</p> <p>315097</p>

315098

315099

315100

Correct Option: 315099

Candidate Response: 315099

203493

LOGICAL
REASONING

The admission ticket for an exhibition bears a password which is changed after every clock hour based on set of words chosen for each day.

Following is an illustration of the code and steps of rearrangement for subsequent clock hours.

The time is 9 a.m. to 3 p.m.

Day's first password :

First Batch ----- 9 a.m. to 10 a.m.

is not ready cloth simple harmony burning

Second Batch ----- 10 a.m. to 11 a.m.

ready not is cloth burning harmony simple

Third Batch ----- 11 a.m. to 12 noon

cloth is not ready simple harmony burning

Fourth Batch ----- 12 noon to 1 p.m.

not is cloth ready burning harmony simple

Fifth Batch ----- 1 p.m. to 2 p.m.

ready cloth is not simple harmony burning and so on.

Taking the given sequence, if the password for 11 a.m. to 12 noon was ;

soap shy miss pen yet the she

Then find the password for the first batch ?

315101

315102

315103

315104

315105

Correct Option: 315101

Candidate Response: 315102

203494	LOGICAL REASONING	<p>Direction: An electronic device rearranges numbers step-by-step in a particular order according to a set of rules. The device stops when the final result is obtained. In this case the device stops at Step V</p> <p>Input: 85 16 36 04 19 97 63 09 Step I: 97 85 16 36 04 19 63 09 Step II: 97 85 63 16 36 04 19 09 Step III: 97 85 63 36 16 04 19 09 Step IV: 97 85 63 36 19 16 04 09 Step V: 97 85 63 36 19 16 09 04</p> <p>Study the above arrangement carefully and then answer the following question that follows :</p> <p>Which of the following will be Step III for the input below?</p> <table border="1"><tr><td>Input:</td><td>09</td><td>25</td><td>16</td><td>30</td><td>32</td><td>18</td><td>17</td><td>06</td></tr></table> <div><div>315106</div><div>315107</div><div>315108</div><div>315109</div><div>315110</div></div> <table><tr><td>Correct Option: 315106</td><td>Candidate Response: 315106</td></tr></table>	Input:	09	25	16	30	32	18	17	06	Correct Option: 315106	Candidate Response: 315106
Input:	09	25	16	30	32	18	17	06					
Correct Option: 315106	Candidate Response: 315106												
203495	LOGICAL REASONING	<p>When a machine is given an input which includes a line of words and numbers, the output received is arranged in a particular manner. Given below is an illustration of input along with the steps followed to get its output :</p> <p>Input: 34 lights ink 56 78 online defeat 99 orange range 87 22 Step I: 22 34 lights ink 56 78 online 99 orange range 87 defeat Step II: 34 22 lights 56 78 online 99 orange range 87 defeat ink Step III: 56 34 22 78 online 99 orange range 87 defeat ink lights Step IV: 78 56 34 22 99 orange range 87 defeat ink lights online Step V: 87 78 56 34 22 99 range defeat ink lights online orange Step VI: 99 87 78 56 34 22 defeat ink lights online orange range</p> <p>Step VI is the final step of the above input.</p> <p>Now, based on the same pattern, find the output for the input given below.</p> <p>Input : 67 54 thankful message listing 23 45 known booklist 90 quit 88</p> <p>How many steps will be required to get the final output ?</p> <div><div>315111</div><div>315112</div><div>315113</div><div>315114</div><div>315115</div></div>											

		Correct Option: 315113	Candidate Response: 315112
203496	LOGICAL REASONING	<p>Which interchange of sign will make the following equation correct :</p> <p>$10 + 10 \div 10 - 10 \times 10 = 10$</p> <p>315116</p> <p>315117</p> <p>315118</p> <p>315119</p> <p>315120</p>	
		Correct Option: 315120	Candidate Response: 315117
203497	LOGICAL REASONING	<p>If :</p> <p>R stands for -</p> <p>A stands for +</p> <p>B stands for $\div$</p> <p>C stands for $\times$</p> <p>Then determine the value of the given equation [without applying the BODMAS Rule] ?</p> <p>25 A 37 C 2 B 4 R 1 = ?</p> <p>315121</p> <p>315122</p> <p>315123</p> <p>315124</p> <p>315125</p>	
		Correct Option: 315123	Candidate Response: 315121

203498	LOGICAL REASONING	<p>If :</p> <p>X means addition</p> <p>- means division</p> <p>÷ means subtraction</p> <p>+ means multiplication</p> <p>Then, which of the following equation is correct ?</p> <p>Solve without applying BODMAS Rule</p> <p>315126</p> <p>315127</p> <p>315128</p> <p>315129</p> <p>315130</p> <table><tr><td>Correct Option: 315129</td><td>Candidate Response: 315129</td></tr></table>	Correct Option: 315129	Candidate Response: 315129
Correct Option: 315129	Candidate Response: 315129			
203499	LOGICAL REASONING	<p>TheTop Percentile</p> <p>If $64 \times 52 = 17$, $48 \times 56 = 23$ and $74 \times 35 = 19$, then $84 \times 37 = ?$</p> <p>315131</p> <p>315132</p> <p>315133</p> <p>315134</p> <p>315135</p> <table><tr><td>Correct Option: 315131</td><td>Candidate Response: 315131</td></tr></table>	Correct Option: 315131	Candidate Response: 315131
Correct Option: 315131	Candidate Response: 315131			
203500	LOGICAL REASONING	<p>Which two signs should be interchanged to make the given equation correct :</p> <p>$12 + 156 \div 13 \times 6 - 100 = 50$</p> <p>315136</p> <p>315137</p> <p>315138</p> <p>315139</p>

203509

LOGICAL
REASONING

Read the information given in the Venn Diagram carefully and answer the question that follows :

If the digits in the figure represent the number of people who speak the language, then determine the number of people who speak Tamil and Telugu both :

315181

315182

315183

315184

315185

Correct Option: 315183**Candidate Response:** 315183203510 LOGICAL
REASONING

Read the information related to the Venn Diagram carefully and answer the question that follows :

In the given Venn Diagram consider the details provided below :

Circle represents Professionals

Triangle represents Musicians

Square represents Dancers

Rectangle represents MBA's

Determine the number of MBA's who are not Musicians ?

315186

315187

315188

315189

315190

Correct Option: 315189**Candidate Response:** 315189203511 LOGICAL
REASONING

Read the information given below carefully and answer the question that follows :

There are two grandfathers and two grandmothers in a family of 21. There are six couples each having at least one child. The grandparents have 9 grandchildren altogether, among them three are Anne, Jerry and Ravi. Their father and mother are a physician and physiotherapist respectively. The Physician has a sister who is an Economist. The Physiotherapist has two brothers, one Engineer and a banker. Among the 9 grandchildren there are 5 granddaughters and 4 grandsons. The mother of two granddaughters among the five is the Economist whose husband is not in the party. The father of two grandsons among the four is an Engineer, whose wife is a homemaker.

Question : The Banker has how many children ?

203541	LOGICAL REASONING	<p>Read the information given below carefully and answer the question that follows :</p> <p>25 coloured beads are to be arranged in a grid comprising of 5 rows and 5 columns. Each cell in the grid must contain exactly one bead. Each bead is coloured either Red, Blue or Green.</p> <p>While arranging the beads along any of the 5 rows or along any of the 5 columns, the rules given below are to be followed :</p> <ol style="list-style-type: none">Two adjacent beads along the same row or column are always of different colours.There is at least one Green bead between any two Blue beads along the same row or column.There is at least one Blue and at least one Green bead between any two Red beads along the same row or column.Every unique, complete arrangement of twenty five beads is called a configuration. <p>Question :</p> <p>What is the total number of possible configurations using beads of only two colours ?</p> <p>315341</p> <p>315342</p> <p>315343</p> <p>315344</p> <p>315345</p> <table><tr><td>Correct Option: 315344</td><td>Candidate Response: 315342</td></tr></table>	Correct Option: 315344	Candidate Response: 315342
Correct Option: 315344	Candidate Response: 315342			
203542	LOGICAL REASONING	<p>Read the information given below carefully and answer the question that follows :</p> <p>A shopping mall has a large basement parking lot with parking slots painted in it along a single row. These slots are quite narrow; a compact car can fit in a single slot but an SUV requires two slots. When a car arrives, the parking attendant guides the car to the first available slot from the beginning of the row into which the car can fit.</p> <p>For our purpose, cars are numbered according to the order in which they arrive at the lot. For example, the first car to arrive is given a number 1, the second a number 2, and so on. This numbering does not indicate whether a car is a compact or an SUV. The configuration of a parking lot is a sequence of the car numbers in each slot. Each single vacant slot is represented by letter V.</p> <p>For instance, suppose cars numbered 1 through 5 arrive and park, where cars 1, 3 and 5 are compact cars and 2 and 4 are SUVs. At this point, the parking lot would be described by the sequence 1, 2, 3, 4, 5. If cars 2 and 5 now vacate their slots, the parking lot would now be described as 1, V, V, 3, 4. If a compact car (numbered 6) arrives subsequently followed by an SUV (numbered 7), the parking lot would be described by the sequence 1, 6, V, 3, 4, 7.</p> <p>Question :</p> <p>Suppose the sequence at some point of time is 4, 5, 6, V, 3. Which of the following is not necessarily true ?</p> <p>315346</p> <p>315347</p> <p>315348</p> <p>315349</p> <p>315350</p>		

		Correct Option: 315350	Candidate Response: 315347
203543	LOGICAL REASONING	<p>Read the information given below carefully and answer the question that follows :</p> <p>An academic research journal plans to publish 18 research papers, written by eight authors (A, B, C, D, E, F, G, and H) in four issues of the journal scheduled in January, April, July and October. Each of the research papers was written by exactly one of the eight authors. Five papers were scheduled in each of the first two issues, while four were scheduled in each of the last two issues. Every author wrote at least one paper and at most three papers. The total number of papers written by A, D, G and H was double the total number of papers written by the other four authors. Four of the authors were from India and two each were from Japan and China. Each author belonged to exactly one of the three areas — Manufacturing, Automation and Logistics. Four of the authors were from the Logistics area and two were from the Automation area. As per the journal policy, none of the authors could have more than one paper in any issue of the journal. The following additional facts are also known :</p> <ol style="list-style-type: none"> 1. F, an Indian author from the Logistics area, wrote only one paper. It was scheduled in the October issue. 2. A was from the Automation area and did not have a paper scheduled in the October issue. 3. None of the Indian authors were from the Manufacturing area and none of the Japanese or Chinese authors were from the Automation area. 4. A and H were from different countries, but had their papers scheduled in exactly the same issues. 5. C and E, both Chinese authors from different areas, had the same number of papers scheduled. Further, E had papers scheduled in consecutive issues of the journal but C did not. 6. B, from the Logistics area, had a paper scheduled in the April issue of the journal. 7. B and G belonged to the same country. None of their papers were scheduled in the same issue of the journal. 8. D, a Japanese author from the Manufacturing area, did not have a paper scheduled in the July issue. 9. C and H belonged to different areas. <p>Question : How many research papers were written by Indian authors ?</p> <p>315351</p> <p>315352</p> <p>315353</p> <p>315354</p> <p>315355</p>

ABSTRACT
REASONING

Out of the five given figures, four figures are similar in a certain way, one figure is not like the other four figures. That means four figures form a group based on some common properties. Find out the figure which does not belong to the group i.e., which does not share the common features / characteristics with the other four figures.

VERBAL
ABILITY

Study the following information carefully and answer the question given below.

When you are the chief executive of a public company, the temptation to opt for a merger or acquisition is great indeed. Many such bosses may get a call every week or so from an investment banker eager to offer the kind of deal that is sure to boost profits. Plenty of those calls are proving fruitful. In the first three quarters of 2017, just over \$2.5trn-worth of transactions were agreed globally, according to Dealogic, a data provider. The total was virtually unchanged from the same period in 2016, but the number in Europe, the Middle East and Africa was up by 21%.

It is easy to understand why an executive opts for a deal. Buying another business looks like decisive action, and is a lot easier than coming up with a new, bestselling product. Furthermore, being the acquirer is far more appealing than being the prey; better to be the butcher than the cattle. A takeover may keep activist hedge funds off the management's back for a while longer. And being in charge of a much bigger company is a more demanding task that will surely justify a larger salary for the executives in charge.

But these temptations, good and bad, should generally be resisted. S&P Global Market Intelligence, a research arm of the ratings agency, has updated a study on the impact of deals on the acquiring company's share price. The study looked at M&A deals done by listed companies in America's Russell 3000 index between January 2001 and August 2017; deals were only included if they cost more than 5% of the total enterprise value of the acquirer (5% of the equity value, for financial companies). The acquirers' shares underperformed the market and those of rival firms in the same industry.

That share-price performance was understandable, in the light of what tended to happen to the fundamentals of the acquiring company's business. The study finds that, relative to the company's peer group, net profit margins fall, as do the returns on capital and on equity; earnings per share grow less quickly; and both debt and interest expenses increase. As the deal is done, however, the executives always sound bullish. Costs will be cut, the companies will benefit from selling a wide range of products and so on; a whole range of "synergies" will be achieved. Instead, the combined companies tend to suffer from clashes of culture and teething problems as systems prove hard to integrate. The AOL-Time Warner merger of 2000 is perhaps the most famous example of a dysfunctional deal; at the time, it was one of the biggest mergers in corporate history. Not every deal is that bad. But instead of two plus two equalling the promised five, all too often they add up to three-and-a-half.

What is the tone of the author in the passage?

315741

315742

315743

315744

315745

Correct Option: 315743

When you are the chief executive of a public company, the temptation to opt for a merger or acquisition is great indeed. Many such bosses may get a call every week or so from an investment banker eager to offer the kind of deal that is sure to boost profits. Plenty of those calls are proving fruitful. In the first three quarters of 2017, just over \$2.5trn-worth of transactions were agreed globally, according to Dealogic, a data provider. The total was virtually unchanged from the same period in 2016, but the number in Europe, the Middle East and Africa was up by 21%.

It is easy to understand why an executive opts for a deal. Buying another business looks like decisive action, and is a lot easier than coming up with a new, bestselling product. Furthermore, being the acquirer is far more appealing than being the prey; better to be the butcher than the cattle. A takeover may keep activist hedge funds off the management's back for a while longer. And being in charge of a much bigger company is a more demanding task that will surely justify a larger salary for the executives in charge.

But these temptations, good and bad, should generally be resisted. S&P Global Market Intelligence, a research arm of the ratings agency, has updated a study on the impact of deals on the acquiring company's share price. The study looked at M&A deals done by listed companies in America's Russell 3000 index between January 2001 and August 2017; deals were only included if they cost more than 5% of the total enterprise value of the acquirer (5% of the equity value, for financial companies). The acquirers' shares underperformed the market and those of rival firms in the same industry.

That share-price performance was understandable, in the light of what tended to happen to the fundamentals of the acquiring company's business. The study finds that, relative to the company's peer group, net profit margins fall, as do the returns on capital and on equity; earnings per share grow less quickly; and both debt and interest expenses increase. As the deal is done, however, the executives always sound bullish. Costs will be cut, the companies will benefit from selling a wide range of products and so on; a whole range of "synergies" will be achieved. Instead, the combined companies tend to suffer from clashes of culture and teething problems as systems prove hard to integrate. The AOL-Time Warner merger of 2000 is perhaps the most famous example of a dysfunctional deal; at the time, it was one of the biggest mergers in corporate history. Not every deal is that bad. But instead of two plus two equalling the promised five, all too often they add up to three-and-a-half.

As per the passage, why does it sound tempting to opt for a merger or acquisition?

- I. This path is much simpler than coming up with a new product that would be a bestseller.
- II. It is more appealing to be the one doing the acquisition rather than the one being acquired.
- III. The bigger the company the more returns it guarantees in the long run

Study the following information carefully and answer the question given below.

When you are the chief executive of a public company, the temptation to opt for a merger or acquisition is great indeed. Many such bosses may get a call every week or so from an investment banker eager to offer the kind of deal that is sure to boost profits. Plenty of those calls are proving fruitful. In the first three quarters of 2017, just over \$2.5trn-worth of transactions were agreed globally, according to Dealogic, a data provider. The total was virtually unchanged from the same period in 2016, but the number in Europe, the Middle East and Africa was up by 21%.

It is easy to understand why an executive opts for a deal. Buying another business looks like decisive action, and is a lot easier than coming up with a new, bestselling product. Furthermore, being the acquirer is far more appealing than being the prey; better to be the butcher than the cattle. A takeover may keep activist hedge funds off the management's back for a while longer. And being in charge of a much bigger company is a more demanding task that will surely justify a larger salary for the executives in charge.

But these temptations, good and bad, should generally be resisted. S&P Global Market Intelligence, a research arm of the ratings agency, has updated a study on the impact of deals on the acquiring company's share price. The study looked at M&A deals done by listed companies in America's Russell 3000 index between January 2001 and August 2017; deals were only included if they cost more than 5% of the total enterprise value of the acquirer (5% of the equity value, for financial companies). The acquirers' shares underperformed the market and those of rival firms in the same industry.

That share-price performance was understandable, in the light of what tended to happen to the fundamentals of the acquiring company's business. The study finds that, relative to the company's peer group, net profit margins fall, as do the returns on capital and on equity; earnings per share grow less quickly; and both debt and interest expenses increase. As the deal is done, however, the executives always sound bullish. Costs will be cut, the companies will benefit from selling a wide range of products and so on; a whole range of "synergies" will be achieved. Instead, the combined companies tend to suffer from clashes of culture and teething problems as systems prove hard to integrate. But instead of two plus two equalling the promised five, all too often they add up to three-and-a-half.

Which of the following statements, if true, could be warning signs ahead of a takeover?

- I. The faster the company was growing before the acquisition, the worse it tends to perform afterwards.
- II. All-share deals tend to perform less well than cash offers.
- III. Large deals perform less well than small ones.

Read the following passage carefully and answer the questions given below.

The second-largest colony of emperor penguins in the world appears to be collapsing, after rough seas drowned all of its babies three winters in a row. The Halley Bay colony once accounted for 5 to 9% of the global emperor penguin population, according to the British Antarctic Survey (BAC), which reported the catastrophe. That amounted to about 15,000 to 24,000 adult breeding pairs. But in 2016, the sea-ice platform on which the colony was raising its babies collapsed during rough weather, throwing infant penguins unable to swim into the frigid water. In 2017 and 2018, the rough weather pattern repeated itself.

The birds arrive at the site from their summer sea jaunts each April to breed; for the resulting chicks to survive, the site has to remain stable throughout the Southern Hemisphere's winter, which lasts until December.

By 2018, a handful of adults — a "few hundred," or about 2 percent of the original population — turned up at the Halley Bay site, the researchers reported. The remaining colony appeared in disarray, with adults moving closer to the ice edge than is typical, and was difficult to count scattered among the roughened chunks of ice.

The good news is that at least some of the colony appears to have moved, rather than died out. The DawsonLambton Glacier colony 34 miles (55 kilometres) to the south has significantly swelled in numbers since the devastation of Halley Bay, the BAC reported. That colony, which had hit a low of just 1,280 pairs in the 2015 season, swelled in each succeeding year. In 2016, it reached 5,315 pairs. In 2017, there were 11,117 pairs. And by 2018, a full 14,612 pairs set up camp at the site.

But in 2016, the sea-ice platform on which the colony was raising its babies collapsed during rough weather, throwing infant penguins unable to swim into the frigid water. In 2017 and 2018, the rough weather pattern repeated itself.</p> <p>The birds arrive at the site from their summer sea jaunts each April to breed; for the resulting chicks to survive, the site has to remain stable throughout the Southern Hemisphere's winter, which lasts until December.</p> <p>By 2018, a handful of adults — a "few hundred," or about 2 percent of the original population — turned up at the Halley Bay site, the researchers reported. The remaining colony appeared in disarray, with adults moving closer to the ice edge than is typical, and was difficult to count scattered among the roughened chunks of ice.</p> <p>The good news is that at least some of the colony appears to have moved, rather than died out. The DawsonLambton Glacier colony 34 miles (55 kilometres) to the south has significantly swelled in numbers since the devastation of Halley Bay, the BAC reported. That colony, which had hit a low of just 1,280 pairs in the 2015 season, swelled in each succeeding year. In 2016, it reached 5,315 pairs. In 2017, there were 11,117 pairs. And by 2018, a full 14,612 pairs set up camp at the site.</p> <p>Which of the following is false in the context of the passage?</p> <p>I. The Dawson-Lambton Glacier colony died due to collapse of rough sea. II. The penguin birds breed during April every year. III. Halley Bay colony reached 5315 pairs in 2016.</p> <p>315811</p> <p>315812</p> <p>315813</p> <p>315814</p> <p>315815</p> <table><tr><td>Correct Option: 315813</td><td>Candidate Response: 315811</td></tr></table>	Correct Option: 315813	Candidate Response: 315811

203636	VERBAL ABILITY	<p>Read the following passage carefully and answer the questions given below it.</p> <p>The Sun, while going on his daily rounds saw a princess and fell in love with her. Whenever he could slip away from the heavens he would take human form and go down to the princess to spend some time with her. The princess too became quite fond of him and would wait for him to come. One day the Sun decided to send her a blood-red ruby as a token of his love for her. He put the gem in a silk bag, and calling a crow that was flying past, asked the bird to deliver the gem to his beloved. Crows had milky white feathers in those days and it was considered auspicious if a crow came anywhere near you. So the Sun was pleased that he had found a crow to deliver the gem. As the crow sped through the sky with the silken bag, the aroma of food lured him. Looking down, the crow saw that a wedding feast was in progress, and immediately it was distracted from its mission. Food was one thing it could never resist.</p> <p>Alighting on a tree nearby, it hung the bag on a twig and went off to find some food. While the crow was feasting, a merchant passing by saw the bag on the tree, and knocked it down with a pole. When he opened the bag and saw its contents he almost swooned in joy. Quickly pocketing the ruby, he filled the bag with dry cow dung that was lying there, and then deftly returned the bag to the branch. It was all done so quickly that the crow missed all the action. After having its fill, it flew up to the tree, and picking up the bag and took it to the person it was intended for. The princess was in the garden. When the crow gave her bag, she took it eagerly, knowing that it was from the Sun. But when she saw its contents she reeled back in shock and anger. Believing that it was the Sun's way to telling her that he did not care for her, she flung the bag away, rushed to her palace, and never came out again. When the Sun learnt of what had happened he was furious. So great was his anger that when he turned his scorching gaze on the crow, its feathers were burned black. Its feathers have been black ever since. The ruby did not stay with the man who stole it. It fell out of his pocket and rolled into a deep pit. Men have been trying to dig it out ever since. Many precious stones have been found in the process, making Myanmar one of the richest sources of rubies and sapphires, but the ruby that the Sun sent to the princess is yet to be found.</p> <p>Why did the princess fling the gift away?</p> <p>315816</p> <p>315817</p> <p>315818</p> <p>315819</p> <p>315820</p> <table><tr><td>Correct Option: 315818</td><td>Candidate Response: 315819</td></tr></table>	Correct Option: 315818	Candidate Response: 315819
